Industrial Valves Ltd
Double Hinge Flap Valve 80-600
MODEL IVLFVDH5000
Technical Data Sheet

DN80 - 600 - DOUBLE HINGE FLAP VALVE (MODEL IVLFVDH5000)

Metal seat double hinge flap valve with circular aperture to prevent reverse flow in outfall applications. Typically utilised in river, surface/storm water and treatment works outfalls.

Features:

- Unique lightweight ductile iron design
- Durable fusion bonded epoxy coated
- Corrosion resistant construction
- Double hinge for optimal sealing
- Anti-tamper stainless steel hinge pins
- Lifting eye as standard
- Drilled to suit both flange and wall mounting
